

INTEGRATED SOLUTIONS. PROVEN RESULTS.

**WE APPROACH EVERY PROJECT AS
A PARTNERSHIP THAT IS BUILT ON
INTEGRITY, HONESTY, AND RESPECT.**

CONTENTS

OUR HISTORY

For over 40 years, our business model has been built on developing long-term relationships with our clients. We are a company known for helping our customers succeed by designing the highest quality projects with integrity, skill, and timeliness.

1979

Grant, Phipps, Tsutsumi and Associates was formed. It began in a two-bedroom apartment on the 15th floor of Charter Towers in Calgary, Alberta.

1981

Company was purchased and moved into a building at 5th Ave and 14th St at the same time the Canadian federal government was instituting the **National Energy Program**.

Company evolved into a **corporate partnership** operating under the name GPT Consulting Services.

1990

CH2M, a multinational engineering and consulting firm, acquired GPT Consulting Services as their O&G division. **GPT Consulting** maintained it's brand until 1994.

1994

CH2M exited the O&G business. A new partnership was established with Dan Fehr, who was running an engineering company called **Concise Design Limited**.

Lauren opened the **Vancouver office**.

2014

Partners from Concise Design along with Vancouver office personnel acquired a majority interest in the Canadian operation and **began operation as Lauren, a corporate partnership**.

2020

Lauren buys out remaining shares from Lauren Engineers and Constructors.

Lauren opened the **Kelowna office**.

Lauren opened the **Houston, TX office**.

MEET THE TEAM

At Lauren, relationships come first.

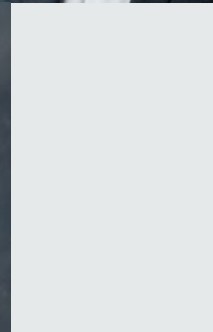

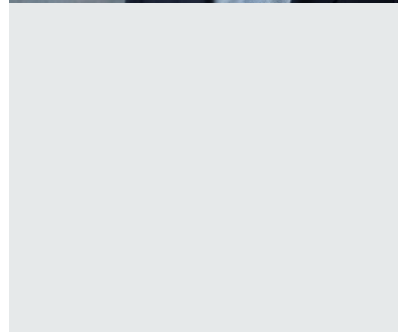

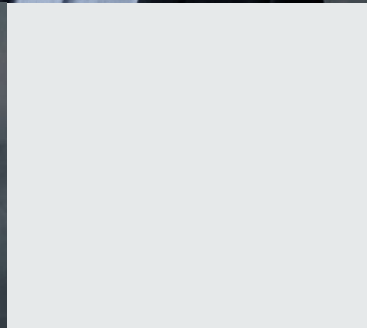

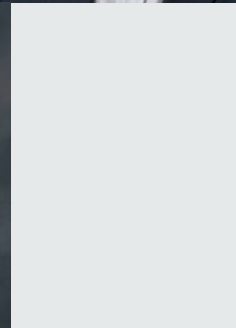

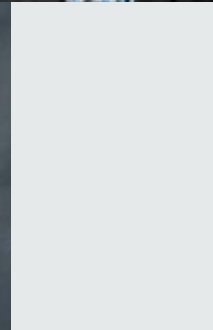

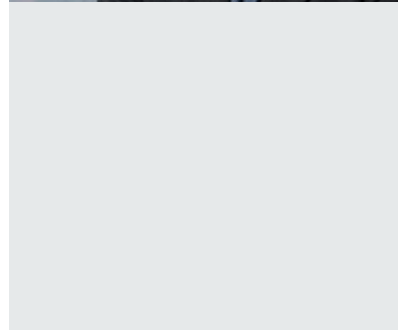

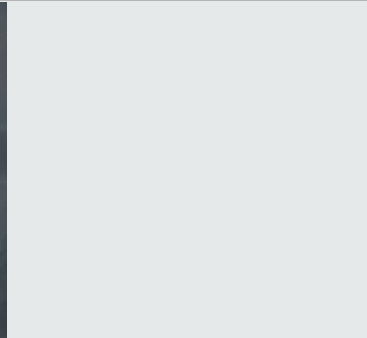

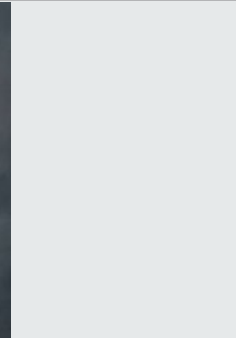

Behind every project is a team of experienced engineers, project managers, technical specialists, and client leaders committed to helping clients succeed. Our leadership team brings decades of experience across traditional energy, renewable and transitional energy, and industrial infrastructure.

What sets Lauren apart is not just technical expertise, but our commitment to responsiveness, accountability, and building long-term partnership. We believe the best projects are built on trust, open communication, and a shared commitment to results.

From concept through execution, our team works alongside clients as an extension of their organization, bringing practical solutions, disciplined execution, and a one-team approach to every challenge.

OUR NORTH AMERICAN APPROACH

A stylized map of North America, including Canada, the United States, and Mexico, is shown in a light blue color against a dark blue background. The map is positioned on the right side of the page, with the text 'OUR NORTH AMERICAN APPROACH' on the left. The map highlights the locations of Lauren's offices: Calgary, Vancouver, Kelowna, and Houston.

Lauren delivers engineering and project delivery solutions where our clients operate.

With offices in Calgary, Vancouver, Kelowna, and Houston, our teams support projects across Canada and the United States, providing local knowledge, regional expertise, and the resources to execute complex programs across multiple jurisdictions.

Whether supporting critical energy infrastructure, industrial facilities, renewable energy projects, or emerging transitional energy opportunities, Lauren combines the responsiveness of a regional partner with the depth and capability of a larger organization.

Our approach is built on three principles:

- Local presence and relationships
- Integrated, multidisciplinary project delivery
- Long-term partnerships focused on client success

Across North America, clients rely on Lauren for practical solutions, technical excellence, and a commitment to getting the job done right.

WE DO CLIENT RELATIONSHIPS DIFFERENT

Believing our work can help move the world forward, one idea, one design and one solution at a time, we are dedicated to providing our clients with the finest engineering services delivered by the highest level of customized, hands-on client service. At Lauren we strive to build meaningful, collaborative, long-term partnerships, while remaining responsive and results focused.

THE LAUREN WAY. We promise to be transparent and responsive in our dealings with you. Because we care.

SECTORS WE SERVE

Lauren brings complex infrastructure to life across North America, delivering engineering, procurement, and construction management services for the sectors that keep economies moving.

Our teams work where our clients operate. Across every geography and sector, our approach is the same: responsive service, disciplined execution, and a one-team mindset focused on getting the job done right.

Traditional Energy

Supporting safe, reliable, and efficient energy infrastructure across the full asset lifecycle.

- Pipelines and meter stations
- Tanks, terminals, and storage facilities
- Gas plants, compression and pump stations
- Remote oil and gas facilities and well sites
- Refineries (BOP and turnaround engineering)
- Rail and truck loading / offloading
- Maintenance and expansion capital programs
- Plant debottlenecking and MOC support

Renewable & Transitional Energy

Helping clients bridge today's operations with tomorrow's energy systems.

- Renewable power (solar, wind, and grid-connected systems)
- Hydrogen facilities and pipelines
- Renewable natural gas (RNG)
- Carbon capture and low-carbon infrastructure
- Biomass and pellet plants

Industrial & Infrastructure

Delivering pragmatic, future-ready solutions for industrial and public assets.

- Balance of plant (BOP) engineering
- Ports, terminals, and bulk fueling facilities
- Chemical and mining facilities
- Electrical houses and substations
- Fabrication engineering and EFC support
- Asset management and industrial infrastructure

HOW WE DELIVER

At Lauren, services are built around how projects actually get delivered in dynamic and often challenging conditions. Our integrated model brings technical depth, accountability, and flexibility to complex, multi-disciplinary work.

By aligning engineering, project delivery, and commercial insight, we reduce risk, improve predictability, and support confident decision-making from concept through execution.

Engineering Services

- Process Engineering
- Process Transient Analysis
- Mechanical Engineering
- Piping and Pipeline Stress Analysis
- Pipeline Engineering
- Civil Engineering
- Structural Engineering
- Electrical Engineering
- Electrical Utility Engineering
- Electrical Planning Report
- Instrumentation
- Automation and Controls
- Trenchless Engineering
- Hydrotechnical Engineering
- Integrity Engineering
- Substation Engineering

Project Services

- Project Conceptualization
- Project Management
- Procurement
- Project Controls
- Document Control
- Cost Estimating

Specialty Services

- Electrical Arc Flash Study
- Geotechnical Consultation
- Asset Management
- Construction Inspection
- HAZOP/PHA Facilitation
- Monte Carlo Risk Assessments

OUR FOUNDATIONS

Integrity

Integrity is everything. It means trust, transparency, honesty, and respect: for ourselves and others, inside and outside the organization. At Lauren, integrity means making the right choice, not just the easy one.

Adaptable

We choose to thrive, not just survive. Adaptability makes all the difference in an industry as fast-paced and dynamic as ours. We're built to overcome challenges and solve any problems we face. We stay one step ahead of the pack. Flexibility is our superpower: in our thinking, our attitude, and our response. Where others see obstacles, we see an opportunity to prove what we're made of.

Accountable

The buck stops here. Always here. Accountability isn't about what's in your job title; it's about taking ownership. We understand and accept our responsibility to our internal and external stakeholders, to the industry we represent, and to our colleagues. We are reliable, we are dependable, and we speak up when we see something that can be improved — our word matters.

Collaborative

We foster a mindset of shared success. We're at our best when we work together as a team and harness the collective strengths and talents of each other, the diversity of experiences and backgrounds, opinions and ideas. Everyone has the opportunity to contribute, to inspire, and to help one another develop and grow. We listen more, and we assume less.

Quality

Ready, willing, and able to do our jobs to the best of our ability. We know what our role is, and we do it right. We strive for the best result, every time. Our work style is organized and thorough while leaving room to manage the unexpected in this fast-paced work environment. We meet the highest standards by emphasizing attention to detail, continuous improvement, and pride in achievement.

SAFETY IS EVERYTHING

At Lauren, safety isn't a checkbox, it's a mindset. It shapes how we plan, lead, and execute every day.

Health, Safety, and Environmental (HSE) performance is fully integrated into how we operate. Our program is built on clear procedures, proactive hazard identification, open communication, and shared accountability across every role and project. At Lauren, zero incidents is the baseline we aim for every single day, and our track record proves it.
