

# CIVIL/STRUCTURAL ENGINEERING & DESIGN

**Lauren's highly qualified and multi-disciplinary professional engineers help our clients realize limitless possibilities and excellence across geotechnical, civil, structural engineering and drafting services.**

Our technical team brings industry-leading, 'fit for purpose' and cost-effective solutions to diverse and often challenging projects in oil & gas, industrial and transitional energy.

Our suite of design services includes civil and structural design, drainage and site grading design, erosion and sediment control, stormwater management, bridge and pavement design. We have earned the trust of our construction partners with the clarity of our communication and the depth of our support. Lauren takes project and client accountability to a new level, responding in a timely manner to site issues and providing alternative solutions, fast.
